PPE & APPAREL

AAMI Level 3 Gowns for Sterile Processing

Decontamination is wet work, and a gown cut for an isolation room is not built for what comes off a sink. This one reinforces the front, chest and sleeves, where the spray actually lands.

- Reinforced critical zone across front, chest and sleeves, built up in polyspun bound and polyethylene
- That reinforced layer nearly doubles critical zone protection against a standard AAMI Level 3 gown
- Breathable 35 gsm SMS base layer, anti-static and alcohol repellent, for all day comfort and protection
- Meets AAMI Level 3 and EN 13795 performance requirements
- Designed for the Sterile Processing Department, not adapted from a patient isolation gown
- Three sizes, L through XXL
