PATIENT CARE

Super Absorbent Underpads

Underpads that hold what they take on instead of handing it back. Skin stays dry, linen changes drop, and the pressure injury program gets a real assist.

- Quilted core pulls fluid off the skin and locks it in, which is the whole difference between pads
- Waterproof backing keeps it out of the mattress, so a change is one pad and not the whole bed
- Fewer linen changes per shift, which nursing feels immediately
- Sealed edges and a soft top sheet, for a pad that sits against a patient for hours
- A working component of pressure injury prevention, not just a floor stock line item

Product Specifications

ITEM NUMBER	DESCRIPTION	PACKAGE
